

FAMILY HEALTH CLINIC

Open in 2024, Almost Home's Family Health Clinic increases the health, well-being, and wraparound services for young families participating in Almost Home's program. The clinic accomplishes stabilizing and reaching goals of improving social determinants of health and justice for our members and their families. We would like to offer this service to those who have graduated from our program and reside in the community.

"The Almost Home Family Health Clinic is accessible and convenient. Many of our young moms struggle to feel safe. They have experienced multiple traumas and discrimination, making it difficult for them to entrust their bodies or their children's bodies to a stranger. By establishing a long-term relationship with the nurse practitioner, members can build trust and a sense of safety. Without the barriers of cost, transportation, and mistrust, the young families we serve will increase their access to healthcare and achieve more positive health results." –Huvona Watkins, Executive Director of Almost Home

Almost Home's facilities also include living space for 15 young families including up to 25 children, classrooms, an indoor playroom, mindfulness, living, and dining room, kitchen, offices and twelve supervised apartments in our Independent Living program across the street from the main building.

OUR MISSION: Almost Home empowers young moms to become self-sufficient and create a better future for themselves and their children.
